BUILDING IN EDMONTON

Building permits issued thus far in the year call for a total expenditure of \$2,339, 350, an increase of \$700,000 over the figure for the corresponding period last year. And 1920 was by no means an increase activity learn in 1925, and has continued each summer with increasing momentum. The population of Edmonton is growing. It has been growing for several years, steadily and with fair rabidity. It is apparently growing this year more rapidly than for a good of the second of the s the factor which lies at the change in conditions. The re-creased production in the m-thirds of the province is reac-city. There is more business to more opportunities to carn at the new and enlarged quarter on business, and the hundreds which have been built and one living. Hence s for carrying of new houses upied.
